SUPPLEMENTAL APPEAL BRIEF

In response to the Notice of Non-Compliance dated September 16, 2004, complaining that the summary in part (5) did not refer to page and line numbers, replace the original summary with the summary herein. The rest of the brief remains unchanged.

(5) **Summary of Invention**

Using Claim 1 as an example, the invention is a method for providing paper models (23, page 5, second paragraph, Figure 2) that includes allowing a user to access a computer site (12, Figure 1, page 4, first paragraph under "Detailed Description") on a wide area computer network (14, id.), and providing, on the computer site, at least one model page (Figure 3, block 42, page 6 bottom). The method also includes permitting the user to access the model page (id.). The user can print a data file from the model page (Figure 3, blocks 56 and 58, bottom of page 7 continuing to top of page 8). The data file is useful for causing a computer printer to print a substrate having model indicia thereon (id.). The model indicia is useful for configuring the substrate into a paper model (block 66, Figure 3, first full paragraph page 8).
